greenhouse sports

Dear Parent / Guardian,

I'm Coach Mentor Asando, and I'm sending you this letter as we would like you're your child to be involved in the Basketball Greenhouse Sports programme at
St Paul's Way School

What Greenhouse does:
Improves attendance, behaviour, wellbeing, and life skills through structured, evidence-based sports-mentoring programmes, using a positive youth development approach.

I lead sessions before, during, and after school:

- **Before school:** breakfast clubs that offer structure, connection and get participants to school on time
- **During school:** one-to-one mentoring, targeted activity, and small group support
- **After school:** sport sessions that build trust, discipline, and belonging

Sport may be the entry point for many – but every session is about skills, confidence, and relationships that last using our **STEP Life Skills Curriculum** of Social, Thinking, Emotional & Physical development.

We also go further and create opportunities that raise ambitions and open doors:

- Enrichment trips from events to challenge activities, and meeting Olympians!
- Tournaments and competition opportunities that build independence and connection
- Employability experiences with our partners – from office visits to work experience
- Holiday camps that keep young people active, safe, and supported all year-round

To attend any curriculum time or extra-curricular session with us, **everyone must register**. Please therefore go to the link below or scan the QR code to complete the Greenhouse Sports registration form as soon as you get this letter. We cannot support your child without this.
